

Final Mock up Notes

- Body font – a little too stylized
 - o Chose something more monotype/sans serif
- Hyperlink the mentions of art in the paragraphs
- Gallery page – add titles and artists
- The salmon color – make brighter
- Add vertical height to gallery rows and add artist above each row
- The text boxes – make right margin larger so the line length is shorter and add paragraph breaks
- If the home page is not going to have a nav bar, and you want people to click the “pop” to get to the other pages make it more obvious
 - o Change the treatment of the home page, write “explore more” or smth bc right now it is not obvious to the user that the pop will take them to more info
